

Overdose Prevention Centers: Services Offered

People in Burlington were asked what they want to see from an overdose prevention center. This is some of what they said:

HIV/HepC testing
buprenorphine on site
peer support
medical care
legal services
mental health referrals
& drug treatment
showers
case management
bathrooms
drug checking

Overdose prevention centers across the US and the world have provided health care, referrals to drug treatment, food, showers and laundry, emotional support from staff, and more.
